Adolescent Substance Abuse - Evidence-Based Approaches to ...
There is strong evidence for the efficacy of psychosocial or behavioral interventions in the treatment of adolescent SUDs. As such, evidence-based behavioral interventions should be used as the backbone or platform for treating adolescents with SUDs. Working with parents and families can also improve treatment outcomes. All adolescents who present with substance use or SUDs need to be carefully assessed for co-occurring

adolescents between the ages of 12 and 17. 1 This study revealed that on average 1: 25% of teenagers used alcohol. 13.3% used marijuana. 10% used tobacco.

MET/CBT: Treatment of Adolescent Substance Abuse
Most adults who develop a substance use disorder report having started drug use in adolescence or young adulthood, so it is important to identify and intervene in drug use early. Adolescents can benefit from a drug abuse intervention even if they are not addicted to a drug. 18 Substance use disorders range from problematic use to addiction and can be treated successfully at any stage, and at any age. For
