e. Attachment-based psychotherapy is a psychoanalytic psychotherapy that is informed by attachment theory. As a branch of relational psychoanalysis, attachment-based psychotherapy combines the epidemiological categories of attachment theory (including the identification of the attachment styles such as secure, anxious, ambivalent and disorganized/disoriented) with an analysis and understanding of how dysfunctional attachments get represented in the human inner world

An attachment-based model of complicated grief including ...
Modern Attachment Theory is based in three principles which include bonding as an intrinsic human need; regulation of emotion and fear to enhance vitality; and promoting adaptiveness and growth. Common attachment behaviours and emotions, displayed in most social primates including humans, are adaptive. The long-term evolution of these species has involved selection for social behaviors that make individual or group survival more likely.
