Early Intervention - Autism Society

People with autism are 'dying younger,' warns study. "People with autism are dying earlier than the general population," BBC News reports. A recent study in Sweden showed the average age of death for a person with autism spectrum disorder (ASD) is 54 years, compared with 70 for matched controls. The study used records of 27,122 people diagnosed with ASD to look at how long they lived, what the main causes of death were, and how their chances of death were affected by whether they were male ...
